

Ensuring variations in clinical practice are represented accurately in the new national cancer chemotherapy (SACT) programme

Dr Ken Lloyd, Sue Forsey and Mike Wallington

SACT programme – two year implementation period

After first 12 months:

84% of trusts submitting data

101,000 patient records

185,000 regimens recorded

Why is accurate recording of variations in practice so important?

Achieving a balance:

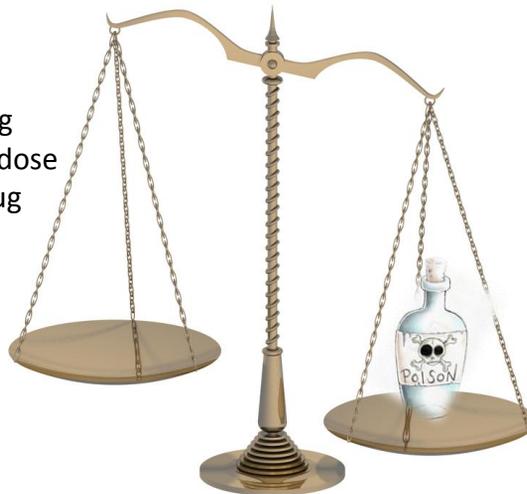

SACT Systemic Anti-Cancer Therapy
Chemotherapy Dataset

SACT data and reporting quality assurance processes

Chemotherapy data are complex and data relating to a single patient will typically extent over months or years

Multi-stage technical and clinical quality assurance processes are required to ensure that analyses and aggregated data are of high quality

SACT data and reporting quality assurance processes

File Details

RBA-01060 Copy of chemotherapy data set - clin status programme and regimen april-may 2012 - Final (For Ch.csv [csv] Approved ✓
16/06/2012 02:34:57

This file contains the details of **193** patients with Cycles started between **26/03/2012** and **05/06/2012** in

809 individual records, of which :-	809
0 are fully valid	0.0 %
679 are partially valid	83.9 %
130 contain errors (and will not be uploaded)	16.1 %

File uploaded by: _____ Orig Codes: RBA11

Overall quality of submitted data in file (Mandatory fields are marked in red)

Field	Passed	Errors	Missing	Warning	Notes
NHS_number	809	0	0	0	
Date_of_birth	809	0	0	0	
Gender_current	809	0	0	0	
Ethnicity	779	0	0	30	Warning: Field is missing from some records.
Patient_postcode	796	13	0	0	Field is too short in 1 record. [more]
GP_Practice_Code	806	0	0	3	Warning: Field is missing from some records.
Consultant_GHC_code	131	0	0	678	Warning: Field is missing from some records. [more]
Consultant_speciality_code	790	0	0	19	Warning: Field is missing from some records.
Organisation_code_of_provider	809	0	0	0	
Primary_diagnosis	525	0	0	284	284 records contained unrequired character(s) which were removed. [more]
Morphology	469	0	0	340	Warning: 'M85003' is not recognised [more]
Stage of disease at start of programme	585	0	0	224	Warning: Field is missing from some records.

Mandatory fields with faults are marked in red
Fields marked as warning are currently allowed but will become errors or missing in the future

SACT data and reporting quality assurance processes

- data quality analysis
 - mandatory provider approval
 - correct regimen grouping
 - regimen profile confirm
 - outlier scrutiny
- process review and update (continuous)

SACT data and reporting quality assurance processes

1. Screen analyses for unusual patterns of activity
2. Re-analyse to confirm outlier finding
3. Seek expert opinion on current practice
4. Decide if this an issue that is:
 - a) In acceptable range but limited patient choice
 - b) Acceptable practice but worrying trend
 - c) Of potential clinical concern
5. If c, write formally to trust medical director and clinical cancer lead informing them of the finding and giving them 28 days to respond
6. In all cases continue to monitor and review practice
