

Kent and Medway

Cancer Alliance Data Pack

By CCG

February 2018

Version 1.2

Produced by the Cancer Alliance Data, Evidence and Analysis Service (CADEAS)

For any enquiries contact: england.CADEAS@nhs.net

Contents

- 1 Summary of key findings
- 2 About the data pack
- 3 How to interpret the data
- 4 Further data releases
- 5 Alliance key indicators grid
- 6 Alliance key indicators grid, with values
- 7 Alliance indicators by CCG

Outcome indicators

- ◆ One-year age-standardised net cancer survival
- ◆ Under-75 age-standardised cancer mortality rate
- ◆ Cancer prevalence
- ◆ Patient experience: rating of overall care

Pathway indicators

- ◆ Bowel screening uptake and coverage
- ◆ Breast screening uptake and coverage
- ◆ Cervical screening coverage
- ◆ Cancers diagnosed through an emergency presentation
- ◆ Routes to diagnosis: breast, colorectal, lung and prostate cancer
- ◆ Cancer waiting times: two-week wait and 62-day standard
- ◆ Age-standardised cancer incidence rate
- ◆ Cancers diagnosed at stage 1+2
- ◆ Cancers staged
- ◆ Median waiting times: prostate, colorectal and lung cancer

8 Annex of data sources

This data pack uses information provided by patients and collected by the NHS as part of their care and support

Version Number	Detail	Date
1.0	Initial release	09/02/2018
1.1	Error spotted in one-year cancer survival chart title. Correction made. Data are for adults diagnosed in 2015 and followed up in 2016	12/02/2018
1.2	Text in the pack has been updated to reflect change from internal to public use	20/11/2018

1. Summary of key findings

The Kent and Medway Cancer Alliance

Latest data on some of the key cancer indicators suggest the standard of cancer care in the Alliance was generally in line with the England average.

West Kent CCG performed better than the national average across the greatest number of indicators, while Medway CCG scored below the national average most often.

Screening: Screening uptake and coverage was better than England levels in three CCGs: Canterbury and Coastal, South Kent Coast and West Kent CCGs, with poorest coverage and uptake in Dartford, Gravesham and Swanley, and Medway CCGs.

Cancer waiting times: Two-week wait performance was mixed with four CCGs performing better than the national target (Ashford, Canterbury and Coastal, South Kent Coast and Thanet CCGs) and the remaining four performing worse than the benchmark. The 62-day standard was not met in any CCG in the Alliance, with Thanet CCG reporting the lowest compliance.

Emergency presentations: Emergency presentations were mostly at or worse than England levels, with Dartford, Gravesham and Swanley, and Thanet CCGs performing worse than the England benchmark. However, Ashford CCG had a lower proportion of cancers diagnosed through emergency presentation than the England average.

Early diagnosis: All CCGs met the England level for proportions of cancers diagnosed at an early stage, with the exception of South Kent Coast and West Kent CCGs who reported a higher proportion of cancers diagnosed at an early stage.

Survival: One-year cancer survival rates were mixed, with Medway, South Kent Coast, Swale and Thanet CCGs reporting worse than England levels. However, West Kent CCG reported better one-year survival than the England level.

Mortality: Under-75 cancer mortality outcomes were mostly consistent with the England average. However, Medway and South Kent Coast CCGs reported higher mortality, and West Kent CCG reported lower mortality, than expected.

Patient experience: Patient reported experience of care was in line with England averages in four CCGs, and worse in four CCGs.

2. About the data pack

Cancer Alliances were formed as a result of recommendations in the 2015 Independent Cancer Taskforce's Achieving World-Class Cancer Outcomes report. The 19 Alliances lead on the local delivery of the Cancer Strategy Implementation Plan, using a whole pathway and cross-organisational approach.

CADEAS is a partnership between NHS England and Public Health England. The service supports Alliances with their data, evidence and analysis needs, to help drive evidence-based local decisions in the delivery of the Cancer Strategy Implementation Plan.

This data pack aims to provide all Cancer Alliances in England with a snapshot of cancer in their local populations, with a breakdown by Clinical Commissioning Group (CCG).

3. How to interpret the data

This data pack highlights variation in cancer services across CCGs in the Alliance. By using a colour coding system Alliances can identify where variation exists and prioritise areas for action. Data here should be considered alongside other sources of information for contextual and richer interpretation.

The colour system: broadly, yellow indicates data are similar to the England level. Dark blue shows data are better than England and light blue indicates data are worse than England. Some metrics have been benchmarked to operational standards or expected values; these are denoted in the legends and in the Annex. All statistical tests for England benchmarking have been conducted using a 95% confidence level.

At the time this report was made, there were three sites of the National Cancer Vanguard and 16 Alliances and the metric geography labels reflect this.

Information on data sources can be found in the Annex.

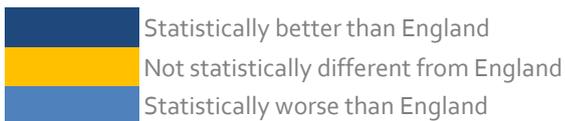

4. Data releases

CADEAS have released the following products, containing data metrics for the Cancer Alliances:

- ◆ A one-off CCG level data pack for each of the 19 Cancer Alliances, to enable comparisons across CCGs within an Alliance.
- ◆ Indicator summary grids comprising key indicators for each Alliance, available at CCG, STP and Alliance levels. These are similar to the grids found in sections 5 and 6 of this data pack and are published by CADEAS on a monthly basis.

5. Cancer Alliance key indicators grid, by CCG

	One-year cancer survival	Under 75 cancer mortality age-standardised rate	Patient experience	Bowel screening coverage (60-69)	Bowel screening uptake (60-69)	Bowel screening coverage (60-74)	Bowel screening uptake (60-74)	Breast screening coverage	Breast screening uptake	Cervical screening coverage	Emergency presentations	Cancer Waiting Times: Two-Week Wait	Cancer Waiting Times: 62-day Standard	Incidence age-standardised rate	Early stage diagnosis	Cancers staged
