Cancer Alliance Data Pack

By CCG

February 2018

Version 1.1

Produced by the Cancer Alliance Data, Evidence and Analysis Service (CADEAS)

For any enquiries contact: england.CADEAS@nhs.net

Contents

- 1 Summary of key findings
- 2 About the data pack
- 3 How to interpret the data
- 4 Further data releases
- 5 Alliance key indicators grid
- 6 Alliance key indicators grid, with values
- 7 Alliance indicators by CCG

Outcome indicators

- ◆ One-year age-standardised net cancer survival
- ◆ Under-75 age-standardised cancer mortality rate
- ◆ Cancer prevalence
- ◆ Patient experience: rating of overall care

Pathway indicators

- ◆ Bowel screening uptake and coverage
- ◆ Breast screening uptake and coverage
- ◆ Cervical screening coverage
- ◆ Cancers diagnosed through an emergency presentation
- ◆ Routes to diagnosis: breast, colorectal, lung and prostate cancer
- ◆ Cancer waiting times: two-week wait and 62-day standard
- ◆ Age-standardised cancer incidence rate
- ◆ Cancers diagnosed at stage 1+2
- ◆ Cancers staged
- ◆ Median waiting times: prostate, colorectal and lung cancer

8 Annex of data sources

This data pack uses information provided by patients and collected by the NHS as part of their care and support

Version Number	Detail	Date
1.0	Initial release	12/02/2018
1.1	Text in the pack has been updated to reflect change from internal to public use	20/11/2018

1. Summary of key findings

The West Yorkshire and Harrogate Cancer Alliance

Latest data on some key cancer indicators suggest the standard of cancer care in the Alliance was generally similar to the England levels. However, there was variation across CCGs within the Alliance.

Harrogate and Rural District CCG had the highest number of indicators that were better than the England levels. Conversely, Bradford City, Leeds South and East, and North Kirklees CCGs all had multiple indicators across the pathway that were worse than the England levels.

Screening: Compared to England, screening uptake and coverage levels were mixed across the Alliance. Bradford City, Bradford Districts, Leeds South and East, and North Kirklees CCGs all reported breast and bowel uptake and coverage at below England levels.

Emergency presentations: The three Leeds CCGs and Calderdale CCG reported emergency presentations (year to Q1 2017) worse than (above) England levels.

Cancer waiting times: The two-week waiting times standard was met in all CCGs in the Alliance (in the year to Q2 2017/18). Over the same period, however, seven of the 11 CCGs in the Alliance did not meet the 62-day waiting time standard.

Early diagnosis: The proportions of cancers diagnosed at stages 1 and 2 (early stage) and cancers staged were at or above the England levels in almost all areas; the only exception was Bradford District CCG with the proportion of early stage cancer reported at below the England level.

Incidence: Incidence rates were at the England level across most CCGs in the Alliance, with the exception of higher incidence in Leeds South and East and Leeds West CCGs.

Survival: Five CCGs were below the England level on one-year survival (Bradford City, Calderdale, Greater Huddersfield, North Kirklees, and Wakefield CCGs) and one was above (Harrogate and Rural District CCG).

Mortality: For under-75 cancer mortality, most CCGs were at the England level, with three worse than expected (Bradford Districts, Leeds South and East and Wakefield CCGs).

Patient experience: Patient reported experience of care was at the England level across the Alliance, with Harrogate and Rural District CCG higher than expected.

2. About the data pack

Cancer Alliances were formed as a result of recommendations in the 2015 Independent Cancer Taskforce's Achieving World-Class Cancer Outcomes report. The 19 Alliances lead on the local delivery of the Cancer Strategy Implementation Plan, using a whole pathway and cross-organisational approach.

CADEAS is a partnership between NHS England and Public Health England. The service supports Alliances with their data, evidence and analysis needs, to help drive evidence-based local decisions in the delivery of the Cancer Strategy Implementation Plan.

This data pack aims to provide all Cancer Alliances in England with a snapshot of cancer in their local populations, with a breakdown by Clinical Commissioning Group (CCG).

3. How to interpret the data

This data pack highlights variation in cancer services across CCGs in the Alliance. By using a colour coding system Alliances can identify where variation exists and prioritise areas for action. Data here should be considered alongside other sources of information for contextual and richer interpretation.

The colour system: broadly, yellow indicates data are similar to the England level. Dark blue shows data are better than England and light blue indicates data are worse than England. Some metrics have been benchmarked to operational standards or expected values; these are denoted in the legends and in the Annex. All statistical tests for England benchmarking have been conducted using a 95% confidence level.

At the time this report was made, there were three sites of the National Cancer Vanguard and 16 Alliances and the metric geography labels reflect this.

Information on data sources can be found in the Annex.

4. Data releases

CADEAS have released the following products, containing data metrics for the Cancer Alliances:

- ◆ A one-off CCG level data pack for each of the 19 Cancer Alliances, to enable comparisons across CCGs within an Alliance.
- ◆ Indicator summary grids comprising key indicators for each Alliance, available at CCG, STP and Alliance levels. These are similar to the grids found in sections 5 and 6 of this data pack and are published by CADEAS on a monthly basis.

5. Cancer Alliance key indicators grid, by CCG

	One-year cancer survival	Under 75 cancer mortality age-standardised rate	Patient experience	Bowel screening coverage (60-69)	Bowel screening uptake (60-69)	Bowel screening coverage (60-74)	Bowel screening uptake (60-74)	Breast screening coverage	Breast screening uptake	Cervical screening coverage	Emergency presentations	Cancer Waiting Times: Two-Week Wait	Cancer Waiting Times: 62-day Standard	Incidence age-standardised rate	Early stage diagnosis	Cancers staged
Airedale, Wharfedale & Craven																
Bradford City																
Bradford Districts																
Calderdale																
Greater Huddersfield																
Harrogate & Rural District																
Leeds North																
Leeds South & East																
Leeds West																
North Kirklees																
Wakefield																

	Statistically better than England
	Not statistically different from England
	Statistically worse than England

Excludes routes to diagnosis, prevalence and pathway median waiting times. This is due to the volume of data in these three areas. Please see data in rest of data pack
